

PATIENT INFORMATION

NAME:	Joyce	HOME COUNTRY:	Kenya
AGE:	31	REASON FOR VISIT:	pregnancy test
Gender:	☐ Male ☒ Female	VISIT DATE:	April 17, 2025

VISIT SUMMARY

You were seen by Kirby K, NP today for a pregnancy check and initial visit.

Testing/Imaging Done Today

A Urinary Analysis was conducted. Results were normal.

A urine pregnancy test and sonogram were performed at no cost to you. Gestational Age based on sonogram is 25 weeks.

Medications Discussed Today

We reviewed safe and unsafe medications to take while pregnant. Prenatal vitamins were gifted during the visit.

At Home Care

We reviewed the discharge booklet that outlines prenatal care and ways to best care for yourself and your baby during pregnancy.

Referrals Made Today

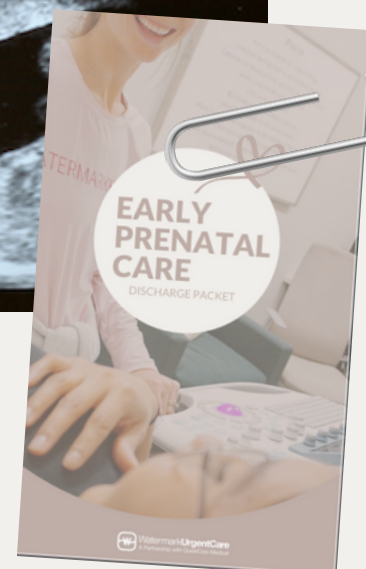

We provided paperwork for you to submit to receive Medicaid benefits while pregnant. We have also connected you to an OBGYN. Prenatal care is critical for a healthy baby and delivery. Our team will call you in a week to see if you have been able to establish care.

You were also connected with a mentor that would like to walk alongside you during the pregnancy and as the baby arrives. They can be a resource for all kinds of needs like help getting to Doctor visits or finding resources needed for the baby.

PASTORAL CARE NOTES

Joyce and her husband moved from Kenya and have been in the United States 9 yrs. They attend a church in Garland and profess a faith in Christ. They had suspicions that she was pregnant, but have mixed emotions. They are without family in the United States and unsure what to do about support. Early Prenatal Care team connected to a mentor.

-Bernadette, Nurse
